Big Data learning objectives

- Principles
- Theoretical background and origins
- Practical experience of modern big data processing systems technologies
- Architecture and design
- Wider context

Pre-requisites

Covered by the Pre-Study Guide

- **Command line tooling and Unix commands**
- **Some Python programming and text editors**

© Paul Fremantle 2015. This work is licensed under a Creative Commons
Attribution-NonCommercial-ShareAlike 4.0 International License
See <http://creativecommons.org/licenses/by-nc-sa/4.0/>

Format

- A mixture of lectures and practical labs
- Lectures aim to provide the wider context and background
 - Independent of specific technologies
- Labs are based on specific technologies
 - Designed to demonstrate the principles

Lab model

- Local Machine
 - Anaconda distribution of Python
 - Other big data software
 - E.g. Apache Spark, Cassandra
- Amazon Web Services
 - Virtual machines in the cloud

Contents

- Big Data motivation and overview
- Using Python for Data Analysis
- Map Reduce and Directed Acyclic Graphs
- Apache Spark
- Spark and SQL
- Theory of scaling
- Running Spark on Amazon
- Introduction to NoSQL databases
- Introduction to Machine Learning

Practicals

- Python Data Analysis
- Spark, SparkSQL
- Spark on Amazon
- Cassandra and NoSQL
- Machine Learning libraries
- Visualisation

Improve your CV?

Leverage the NoSQL boom

Beyond the scope of this course

- Detailed Data Science techniques
- Understanding **all** of Hadoop, Spark, HDFS, Machine Learning

© Paul Fremantle 2015. This work is licensed under a Creative Commons
Attribution-NonCommercial-ShareAlike 4.0 International License
See <http://creativecommons.org/licenses/by-nc-sa/4.0/>

Rules of Engagement

- ***Ask questions as we go along***
 - We will “park” any that are better answered later
 - Don’t wait till the end to ask or raise concerns
 - If you don’t ask we can’t help you

There ~~might~~ will be bugs!

- Please help out:
 - Please create new issues on the Github repository
 - <https://github.com/julieweeds/BigData/issues/>

Approximate Schedule

- Monday
 - Introductions
 - Overview and Motivation
 - Data Analysis with Python and Pandas
 - Map Reduce
 - Apache Spark
- Tuesday
 - SQL
 - Theoretical background on scaling systems
 - Scaling Spark on AWS
 - Visualisation
- Wednesday
 - Introduction to Machine Learning
 - Realtime systems
 - Architecting big data systems
 - Completion of labs

Let's get started
